

Syimyk Zhusupov

Rzeszów, Poland, +48503442257, zhusupovsyimyk66@gmail.com

PROFILE

Motivated IT Programming student with a strong foundation in networking, Linux administration, and cybersecurity fundamentals. Certified by Cisco Networking Academy and seeking an internship or junior role in Cybersecurity or IT Support.

EDUCATION

2024 — 2027

BSc in IT Programming, University of Information Technology and Management (WSliZ)

Rzeszów

Relevant coursework/practice: Networking (TCP/IP, DNS/DHCP), Linux administration, cybersecurity fundamentals, databases (SQL), programming basics (Python).

CERTIFICATIONS

Cybersecurity Essentials

- Cisco Networking Academy

Python Essentials

- Cisco Networking Academy

Network Support and Security

- Cisco Networking Academy

TECHNICAL SKILLS	Linux	SQL
	Wireshark	HTML
	TCP/IP	OSI Model
	DNS	Python
	DHCP	Bash/Shell
	Cisco Packet Tracer	Network Troubleshooting
	Windows	Cybersecurity Fundamentals
	Git/GitHub	Log Analysis (basic)

PROJECTS

Network Security Simulation (Cisco Packet Tracer)

- Built a small enterprise-style topology (routers/switches/hosts) and validated connectivity using TCP/IP troubleshooting.
- Configured core services and controls (DHCP/DNS, basic segmentation, ACL-style filtering) to reduce unnecessary exposure.
- Documented the design, assumptions, and test cases; captured evidence via screenshots/exports for review.

Phishing & Social Engineering Awareness Project

- Created a short awareness module covering common phishing patterns, safe link/attachment handling, and reporting flow.
- Designed example scenarios and a checklist users can apply to emails and messages (sender validation, urgency cues, URL inspection).
- Summarized outcomes and recommendations in a one-page handout suitable for onboarding/training.

Linux System Administration Practice

- Practiced user/group management, permissions, services, and SSH configuration in a Linux lab environment.
- Applied baseline hardening steps (updates, firewall rules, least-privilege mindset) and validated changes.
- Performed basic log review and troubleshooting; wrote simple shell commands/scripts to automate repetitive checks.
